

Dear Families,

December 18, 2020

Today we were made aware that an elementary student has tested positive for COVID-19. It was determined the student was not a close contact with other students as this student has been out of school.

As always, we will be sanitizing our school once again. Please know that this is done on a regular basis. Before we came back to school this fall, the District purchased two machines that are very effective at killing 99.99% of all germs. These devices are used every day. In addition, we have purchased two portable sanitizing machines that our bus drivers use on a daily basis. I mention this because I want our families to know that we do take the health and safety of your children very seriously.

Feel free to email me with any questions or concerns you may have. Should you have any questions for the health department you can reach them at 723-3595.

Sincerely,

Marlen Cordes

Marlen Cordes, Superintendent
Bear Lake School
