

Dear Families,

May 5, 2021

Today we were made aware that one of our student's antigen covid test was confirmed positive through a PCR test. We have a small number of students who were deemed to be close contacts. Those individuals have already been notified and will quarantine for the next 14 days.

Upon the positive antigen test, the cohort classroom was cleaned and sanitized as an extra precaution.

As always, we will be sanitizing our school once again. Please know that this is done on a regular basis. Before we came back to school this fall, the District purchased two machines that are very effective at killing 99.99% of all germs. These devices are used every day. In addition, we have purchased two portable sanitizing machines that our bus drivers use on a daily basis. I mention this because I want our families to know that we do take the health and safety of your children very seriously.

Feel free to email me with any questions or concerns you may have. Should you have any questions for the health department you can reach them at 723-3595.

Sincerely,

Marlen Cordes

Marlen Cordes, Superintendent
